

Use-Case Flow Document

Project Title: Hostel Maintenance & Issue Ticketing System

Use Case: UC-01: Submit Maintenance Issue

Primary Actor: Hostel Resident

Goal: Allow a hostel resident to report a maintenance issue and receive a unique ticket ID.

Main Success Scenario

1. The **Hostel Resident** selects **Submit Maintenance Issue**.
2. The system displays a form requesting the **room number, issue category, and issue description**.
3. The resident enters the required maintenance issue details.
4. The system **validates the issue details**.
5. The system creates a maintenance ticket and assigns it a **unique ticket ID**.
6. The system stores the ticket with its initial status.
7. The system displays the **ticket ID and submission confirmation** to the resident.
8. The use case ends successfully.

Alternate Flow — Invalid or Missing Details

4a. Required details are missing or invalid.

1. The system displays an error message identifying the missing or invalid information.
2. The resident corrects the required details.
3. The system validates the details again.
4. If the details are valid, the flow continues from **Step 5** of the Main Success Scenario.
5. If the details remain invalid, the system asks the resident to correct them again.
